REIDIN.com UAE Residential Property Price Indices (RPPIs) are designed to be a reliable and consistent benchmark of housing sales and rent prices in Dubai and Abu Dhabi. The purpose of the indices is to measure the average differences in house prices in a particular geographic market through a timeline.

### **Methodology**

Dubai sales/ rent index series are calculated monthly, and cover 7 city-wide, 8 main districts and 4 major communities/ projects. Abu Dhabi sales index series are calculated monthly, and cover 7 city-wide and 4 main districts.

The REIDIN.com UAE RPPIs employ arithmetic average of the median prices of districts for constructing index series (the unit method). All indices are also calculated by using a moving average algorithm. The REIDIN.com UAE RPPIs are calculated by using the Dutot price index formula.

### **Coverage**

REIDIN.com UAE RPPIs use monthly sample of offered/asked listing price data and land registry price data (transaction data).
