The REIDIN Turkey Residential Property Price Indices (TRPPIs), supported by GARANTI, are designed to be a reliable and consistent benchmark of housing prices in Turkey. The purpose is to measure the average differences in house prices in a particular geographic market.

Methodology

Index series are calculated monthly for sales and rent covering 7 major cities (Adana, Ankara, Antalya, Bursa, Istanbul, Izmir and Kocaeli), their 71 districts and 481 sub-districts. The national TRPPI (Turkey Composite Index) is a weighted average of those city indices.

The REIDIN TRPPIs use a “stratified median index” approach and are calculated by the Laspeyres price index formula. Indices are set at 100 starting at the beginning of June 2007 (June 2007=100)

Coverage

REIDIN TRPPI, uses monthly sample of offered/asked listing price data, covering over 200,000 house listings per month.
