# EXISTING HOUSE PRICES VS. FINANCIAL INDICATORS

The REIDIN Turkey Residential Property Price Indices (TRPPIs), supported by GARANTI, are designed to be a reliable and consistent benchmark of housing prices in Turkey. The purpose is to measure the average differences in house prices in a particular geographic market.

## Methodology

Index series are calculated monthly for sales and rent covering 7 major cities (Adana, Ankara, Antalya, Bursa, Istanbul, Izmir and Kocaeli), their 71 districts and 481 sub-districts. The national TRPPI (Turkey Composite Index) is a weighted average of those city indices.

The REIDIN TRPPIs use a “stratified median index” approach and are calculated by the Laspeyres price index formula. Indices are set at 100 starting at the beginning of June 2007 (June 2007=100)

## Coverage

REIDIN TRPPI, uses monthly sample of offered/asked listing price data, covering over 200,000 house listings per month.

# REIDIN-GYODER NEW HOME PRICE INDEX: JULY 2014 RESULTS

Issue: 44

- According to the results of REIDIN-GYODER New Home Price Index, in July 2014 there is 0.74% increase with respect to the previous month and in compliance with July 2013 there is 10.79% increase.

# NEW HOME PRICES VS. FINANCIAL INDICATORS

# NEW HOME PRICES VS. FINANCIAL INDICATORS

- **What is?**

It is the indicator index, which is developed from the properties of corporate real estate investment firms generally known as “Branded Projects”, and recently has been produced in many countries like USA, Australia, Canada.

- **Methodology**

The monthly REIDIN-GYODER New Home Price Index uses a “stratified median index” approach for index calculation—an approach that is widely used for indexing housing prices. Taken January 2010 (January 2010=100) as the base period, is calculated with the formula of Laspeyres.

- **Coverage**

REIDIN-GYODER New Home Price Index is calculated on 70 projects and with a monthly average number of 22,500 properties presented by 27 developers.
