The data set also includes existing single-family houses that are either currently or previously occupied.

METHODOLOGY

REIDIN Turkey Residential Sales Price Data is designed to be reliable and consistent benchmarks for housing sales prices in Turkey. At the results of Research&Development studies, data coverage has been expanded to 62 cities of Turkey, their 221 counties and 1083 districts.

REIDIN Turkey Composite Residential Sales Price Data is a weighted average of these cities residential prices. The weights used in the methodology are the "population" of each area which is updated annually

Median Residential Sales Prices are used for the indices in corresponding strata. Once strata have been defined and medians are calculated, they are weighted together to produce a city index and Turkey composite index by using the Laspeyres price index formula.
